

DUAL HOOD

Cavalier's Dual Hoods range accommodate the other hood designs into a double canopy that extracts from the centre. This application is used when a large capture is required with a lower than normal ceiling height.

A popular 'Island install' application is another common operation for the Dual Hood. This is when the cooking equipment operates as a 'back to back' set up which is often seen in schools or training institutes.

Twin Filter Bank Model (AS1668.2-2024, Figure E2 & E5)

Cavalier W BANK Rangehood's are measured to be site specific and achieve the best outcome for your site requirements.

Site specific drawings can be arranged. Please email your kitchen layout to info@cavaliervent.com.au to arrange a drawing.
