

OZONE GENERATOR

Cavalier's Ozone Generators are designed remove & break down pungent or unwanted odours that could pass through the exhaust system.

Ozone is converted from the ambient air through the means of corona discharge (similar to lightning in a storm), which reacts with odours & pollutants from the exhaust to break them down into smaller, odourless particles.

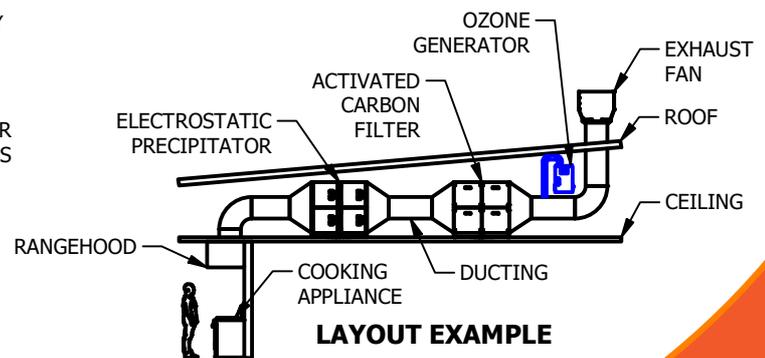

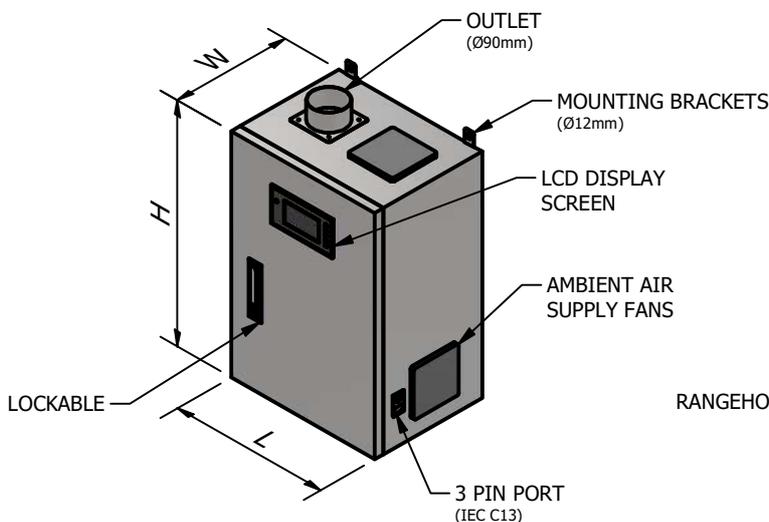

Our Ozone generators comply to AS1668.2-2024 for horizontal discharge for all cooking process types.

REMOTE CONTROLLER
CV-OZG-RMT

Model	CV-OZG-35	CV-OZG-50
Cabinet Size L*W*H (mm)	400*300*600	450*300*600
Cabinet Material	Stainless Steel	Stainless Steel
Cabinet Finish	Semi-Polished	Semi-Polished
Weight	Approx 26kgs	Approx 28kgs
Airflow	Up To 1750L/s	Up To 2500L/s
Exhaust outlet	Ø90mm Spigot	Ø90mm Spigot
Ozone Production	75ppm (35g/hr)	100ppm (50g/hr)
Power Supply	240V / 1PH	240V / 1PH
Power Consumption	350W	450W

29 Liverpool St
Ingleburn NSW 2565
Ph: 1300 422 825
